

I believe that what is happening with the Sinclair corp. to pre-empt regular television programming is just wrong. Most folks are intelligent and understand what motivates corp. to try to sway public opinion by manipulating and perverting actual accounts by real people whom have a different approach to life. Mr. Kerry has a great team of folks backing him, I would hope that if the show must go on then the FCC would provide equal time for opposing opinions otherwise society is being lead by the misuse of airtime by a very powerful industry. Please follow up the program with intelligent journalist critiquing the program, and phone call statements after the show if it must go on.
